

OM VAZIRE

Full-Stack Web Developer • AI & Data Science Undergraduate

Ambernath, Maharashtra | 9552576538 | omvazire1195@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE

Final-year AI & Data Science student and freelance web developer. Built and deployed a production MERN-stack website for a real client, handling requirements, pricing, and delivery end to end. Comfortable across React, Node.js, and MongoDB, and use AI tools to move faster on unfamiliar parts of a build without losing sight of the architecture. Currently strengthening DSA and system design for software development roles.

TECHNICAL SKILLS

Languages: JavaScript, Python

Frontend: React, Vite, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Mongoose

Databases: MongoDB, MySQL

Tools & Deployment: Git, GitHub, Vercel, Render, Postman

AI-Assisted Development: Google Gemini API integration, prompt engineering, using AI tools to build efficiently on top of core fundamentals

EXPERIENCE

Freelance Full-Stack Developer — Client Project (Trivaltor Group)

[Live Site](#) [GitHub](#)

- Built and shipped a production website for a real export business client — handled requirements, pricing, and delivery directly with the client.
- Used a full-stack foundation (React, Node.js, MongoDB) built up beforehand, and leaned on AI tools to implement newer pieces — the admin dashboard, analytics, and security setup — while staying in control of the architecture and decisions.
- Delivered a public site with a product catalogue and enquiry forms, plus an admin dashboard for managing leads and viewing visitor/conversion stats.
- Took the project through to production: deployment on Render, domain and DNS setup on Hostinger, and ongoing uptime monitoring.

IBM SkillsBuild Internship — AI & Cloud Technologies

- Completed a virtual internship covering cloud computing fundamentals and IBM Watsonx AI tools.

PROJECTS

F1GPT — AI Motorsport Q&A Assistant | *React, Node.js, MongoDB, Google Gemini API*

[Live Demo](#) [GitHub](#)

- A full-stack chat app that answers Formula 1 and motorsport questions using the Google Gemini API, with saved conversation history in MongoDB.
- Built to learn how to connect an LLM into a real full-stack app — backend, database, and prompt design — rather than just calling an API from the frontend.

UrbanNest — Rental Listing Web Platform | *React, Node.js, MongoDB*

[Live Demo](#) [GitHub](#)

- A full-stack Airbnb-style rental platform with login, listing management, and a MongoDB backend.

React Weather App | *React, Weather API*

[Live Demo](#) [GitHub](#)

- Shows real-time weather conditions via a weather API with a clean, responsive UI.

Spotify Clone | *HTML, CSS, JavaScript*

[Live Demo](#) [GitHub](#)

- A front-end clone of Spotify with a responsive music player interface and playlist design.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

2023 – 2027

Konkan Gyanpeeth College of Engineering | Currently Semester 7 | GPA 7.5

CERTIFICATIONS & ACHIEVEMENTS

- Getting Started with Artificial Intelligence & Journey to Cloud — IBM
- Build a Free Website with WordPress — Coursera
- Apna College Full-Stack Web Development
- Anthropic API & AI Fluency courses
- Forage job-simulation programs — J.P. Morgan, Deloitte
- Additional: Videography & video editing (DaVinci Resolve) — prior freelance work.
